REVERSE OSMOSIS WATER PURIFIER

“Quality and purity in every drop!”

Experience the power of advanced filtration technology with our Reverse Osmosis Water Purifier. It utilizes a multi-stage process to remove even the tiniest contaminants, such as bacteria, viruses, heavy metals, and chemicals. Enjoy crystal-clear water that not only tastes great but also contributes to your overall well-being.

Filter Configuration :

First Level: PPC composite filter element

Second Level: RO membrane filter element

Products Configurations :

Water capacity: 800G

Inlet water quality: CWA tap water

Water inlet pressure: 0.10Mpa – 0.40Mpa

Water purification flow: 2.0L/min

Rated total net water capacity: 4000L

Out of the tap: 2 points

Rated power: 90W

Products Description :

Deep purification

Effectively filter rust, sediment, colloid and other impurities in water, remove heavy metals, bacteria and

pesticides and other harmful substances and improve the taste of drinking water (sweet)

Fresh water without bucket

Large throughput, make and drink on the spot, fresh pure water without bucket is healthier

Patent folding composite core

Folding filter core + scale inhibitor filter core + compressed carbon rod integrated composite filter core,

layer by layer fine filtration, to ensure the purity of water

More space

Small size, does not occupy the kitchen space

Patent directly inserted filter element

Horizontal side extraction filter element, core change effortless

Filter life reminder

One to one filter life display, timely reminder to replace the filter element.
